

## PROGRAM BENEFITS

The benefits of Dreamzone365 programs extend beyond the direct time spent learning about arts and multi-media. Our organization's mission and goals also serve our youth by providing educational challenges that promote a greater pursuit of educational interest across all areas of learning, most specifically within reading, math and technology. Through the close relationships formed between students and facilitators, students gain self-confidence, typically resulting from the direct attention and care mentoring cultivates.

We anticipate our youth, grounded by this added advantage, will take back to their communities exemplary personal character and values such as: heightened personal responsibility, improved decision making, increased self-concept and positive interpersonal relationship skills.

*Leroy Crawford, Jr.  
CEO/Founder*

Dreamzone365, a youth-centered, non-profit organization, is dedicated to arts, music education and multi-media broadcast engineering within youth. Through classroom study and hands-on activities in studio engineering, digital editing and various multi-media, students gain increased knowledge and expertise of the music, film and entertainment industry. Most importantly, our program assists students to define and work towards achieving personal goals, gaining self-esteem from realizing accomplishments and learn valuable technological skills that will improve their chances for future educational and professional success.

## MISSION STATEMENT

*Dreamzone365* was created to introduce today's youth to positive cultural diversity through effective Modeling, Mentoring, Motivating and Monitoring. Our philosophy is that if we teach our youth the necessary soft and social skills needed to succeed universally, it will increase their ability to independently and competitively make a positive impression in society.

### Program Introduction

Today's youth face many pressures (peer, family, academic, social, etc.) in their growth, specifically because of society's ignorance as to how to deal with their behavior, actions and reactions. The risks today are far greater than they were in previous generations, because unlike in the past where youths understood the importance of education, social responsibility and hard-work, we have teens who struggle with simple everyday issues with a great deal of difficulty. The goal of this program is to help today's teens realize the opportunity for reward and the value of success.

## 3 B'S CURRICULUM

### BUILDING \*BETTER\*BEHAVIORS

- Peer Mediation
- Public Speaking
- Outreach
- Marketing
- Life Skills
- Work-base Learning

Dreamzone365 is committed to helping our youth understand the risks associated with sex. Dreamzone365 is a community enrichment program located in Houston, Texas. In our attempts to provide quality support to families, we have created surveys that help parents and family members to understand some of the questions/conversations our kids face when alone with their peers. We encourage you to take our survey along with your youth and allow this to become a reliable tool when seeking the kid's social understanding one of today's most dangerous issues.
